- Cardiovascular Health
- Full-Body Detoxification
- Metabolism
- Hormone Levels
- Anti-Aging

- Mood and Overall Sense of Wellness
- Immune Health
- Mental Focus
- Energy

### Why Jasmine Tao?

Research shows that the majority of our dietary health is concentrated in our digestive tract. It can affect our overall nutrient absorption, our energy and hormone levels, ability to rejuvenate, detoxify and expel waste. Toxins collect and store in our organs and cells creating poor health, sickness, and even disease.

As these toxins build up in our bodies and collect in our gastrointestinal tract, colon, kidneys, liver, and lungs the sticky slow moving matter builds up and clogs and prevents proper functioning. Over time the build-up starts to show in our abdomen inside our organs as it bloats and bulges our waistline. The general result is a failure to cleanse the organs, a condition called auto-intoxification, which causes the toxins to reabsorb into the organs and tissues and slowly poison our mind and body.

Jasmine Tao is a SuperHerb formula. Used regularly it may gradually reverse the auto-intoxification and may help return our digestive system to it's healthier state. With regular use, our waistlines may start to shrink, we may feel less bloated, we may have better body odor, and our skin, hair, nails, and breath may improve. During this process our energy levels may increase, our appetite may decrease, our brain may think more clearly, our hormone balance may improve, our sex-drive may increase and our general well-being improve. Sip this masterful blend created with the intention of adding daily sustenance with wholesome therapeutic nutrition from Mother Earth. Align with the wisdom of the ages and our ancestors who consumed Herbal Infusions throughout the day for their delight, energy, wellness longevity, life-force, and medicinal health. Jasmine Tao helps create optimal wellness and longevity helping us to live a life of abundance.
